Draft Beer trailers

We provide faucets, handles, drip trays and drain hoses, on the outside of the trailer.

On the inside, we provide the beer lines, CO2 gas lines, keg couplers, CO2 regulator to connect to the CO2 bottle, and the beer shanks, that pass through the wall.

You provide the keg(s) of beer, and a bottle of CO2 gas.

CO2 bottles come in 5 lbs., 20 lbs., and 50 lbs. sizes.

Rule of thumb is 1 lb. of gas per 1 keg of beer. 5 lbs. bottle = 5 kegs, etc.

Beer taps come in sets of 4. The trailer can have either 4, 8, or 12 faucets per side.

Faucets can be on the driver's side, or passenger side, as needed.

Please specify in advance, how many faucets you will, need and on which side of the trailer.
